

Compact, lightweight and flexible, this breathing mask adapts perfectly to the face and offers a wide field of vision without interfering with other visual or hearing protection that the user chooses to wear.

ERGONOMICS

- **Non-return valve** to minimize the user's breathing resistance and fogging inside the mask.
- **Lightweight, non-slip fastening strip** (4 positions for a better comfort)

OPTIMAL PROTECTION AND RESISTANCE

Maximum protection against vapours, dust, metal fumes, oil and water mist, and micro-organisms with a minimum efficiency of 99.95%.

APPLICATIONS

Shipyards, mining, steelworks, foundries, cement works, glass factories, mechanical industries, pharmaceuticals, ceramics, chemicals and textiles.

TYPE OF FILTER / CLASS

HESPA (High Efficiency Synthetic Particulate Airfilter) + P3

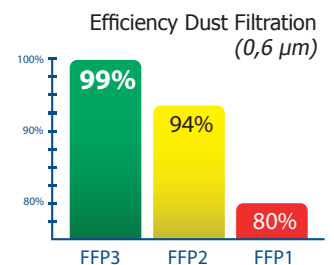

HIGH QUALITY

The materials used in the manufacture of the mask and filters are hypoallergenic, odourless, medical grade and latex and silicone free.

**MADE IN
BRITAIN**
