

SUNCOLOR LED PORTABLE LAMP

Ref. 058477

The SUNCOLOR working lamp is specifically designed for evaluating the car body tints/colours, using an advanced LED able to recreate the natural light. It is also ideal to detect dents and scratches on the body of the vehicles.

A LAMP DESIGNED FOR CAR BODY WORK...

The SUNCOLOR lamp can be used for multiple tasks in the workshop using the swivel hook and the flexible base that tilts up to 180°.

The light created by the SUNCOLOR goes up to 4500K. This results in the artificial light created to be extremely close to day light. This is an ideal situation for the user to be able to identify the colours accurately.

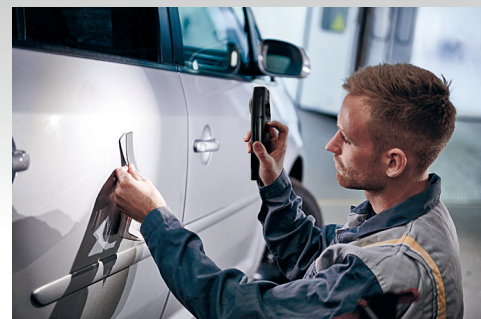

The lamp is fitted with a Li-Ion battery that can be charged using the mains charger or the USB cable, both supplied.

AND DESIGNED TO BE USED IN THE WORKSHOP...

The SUNCOLOR lamp is robust and designed to be resistant enough for tough workshop environments. It is rated IK07 and IP65.

The performance of the unit will not be affected by variations in temperature between 10 and 40°C. The wireless design makes it a very easy tool to use and improves the flexibility of the different tasks being carried out in the workshop.
