

GYS POT 3402, with a power of 3500 A, is an ideal tool for dent removal and straightening of steel carbody elements (bonnet, door, roof panel etc.) The product is multifunctional, and effective for many applications. With its low power consumption, it can work on a simple 230V power supply.

A MULTIFUNCTIONAL DENT PULLER

Modes available :

- **Welding of stars and washers** for panel pulling.
- **Wavy wire welding**, ideal for a curved profile (e.g. wheelarch).
- **Contact shrinking**, to work on light impacts and for the highest quality finish.
- Able to use a graphite pencil.
- Welding of steel studs.

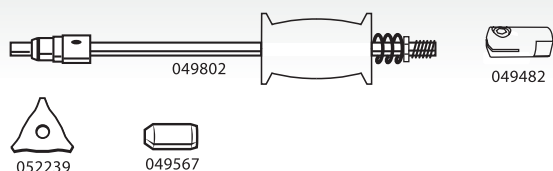

EASY TO USE

- Switch to go to graphite pencil mode.
- **Intuitive**, the control knob enables selection of both the output power and the requested mode.
- **Manual**, the weld is controlled by simply a light press of the gun trigger.
