

Professional battery tester with ultra-precise measurement, intuitive colour display, and built-in printer.

COMPREHENSIVE TESTING FUNCTIONALITY

6 and 12 V Battery Test:

Consists of 4 phases:

- Battery health test
- Cold cranking capacity test (CCA)
- Internal resistance test
- Battery voltage and state of charge test

6 and 12 V starter test:

- Start-up voltage test.

6 and 12 V alternator test:

- Testing of no-load and under-load voltage, as well as under-load current surge.

Waveform:

- Controls the waveform of the battery voltage.

VERSATILE

Compatible with 3 types of lead-acid battery, ranging from 7 to 240 Ah:

- Sealed batteries VRLA / GEL / AGM FLAT PLATE / AGM SPIRAL
- STANDARD LIQUID batteries
- START / STOP batteries (EFB/AGM)

Working specifications:

FR	DIN	SAE	JIS	IEC	CA/MCA
				international standard	marine battery
10 > 2000 A	10 > 1400 A	10 > 2000 A	26A17 > 245H2	10 > 1400 A	10 > 2000 A

HIGHLY ACCURATE

- Automatic external temperature compensation.
- Dynamic resistance measurement minimises battery discharge and gives a reliable result that is not influenced by:
 - surface charge
 - parasitic load (lights, various indicators, etc)
 - contact problems (terminal oxidation, loose terminal lugs)

INTUITIVE & SAFE

- 3.2-inch colour LCD display.
- Result available in less than 1 second.
- Follow up with a new test straight away.
- Stores the results of the last test performed.
- Reverse polarity protection.

- Download the application to your PC for additional functionality: print the most recent tests and update the tester

Interface available in 13 languages

Supplied with carrying case

Detachable cables

USB cable

2 rolls of paper
(ref. 056633)
